DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Endo et al. (US 4774130).

Endo et al. disclose a magnetic recording medium having a substrate, an underlayer of Cr having a thickness as low as about 5 nm (see col. 5, lines 2-4 and 27-30), and a magnetic recording layer formed from a CoCr-based alloy containing 3 at% Cr (see col. 3, lines 10-16; col. 8, lines 61-63).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1773

4. The rejection of claims 2, 10, and 15 under 35 U.S.C. 103(a) as being unpatentable over Ranjan et al. (US 5840394) in view of Chuang et al. (US 6139981) is withdrawn in view of Applicant's amendments and arguments.

Allowable Subject Matter

5. Claims 12 and 15 are allowable over the closest prior art to Kubota et al. and Ranjan et al., respectively.

Ranjan fails to teach or suggest the limitation of claim 15 requiring that "Cr is present only at the crystal grain boundaries of said CoCr-based alloy."

Response to Arguments

6. Applicant's arguments filed 11/13/06 have been fully considered but they are moot in view of the new grounds of rejection.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Holly Rickman whose telephone number is (571) 272-1514. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
